# SAVESLEEVES

We know how important sustainability is within the produce and floral industries. That is why Saveway Supplies is introducing SaveSleeves, the first of its kind sleeves, for your fresh flowers, herbs, and vegetables. The sleeves are made with up to 50% PCR in various resins.

SaveSleeves can be made from BOPP, HDPE, CPP, PE, 30% Post Consumer Recycled material, 50% Post Consumer Recycled material, and Paper.

**Flower Sleeves**

**Vegetable Sleeves**

**Herb Sleeves**

We are committed to enhancing environmental standards within the produce and floral packaging field. Using PCR mitigates the negative impact of plastics, helping reduce pollution while meeting the industry's requirements for preserving and maintaining freshness.

# PCR & GRS Q&A

## **? What is PCR?**

- ✓ PCR stands for Post-Consumer Recycled plastic, an environmentally friendly packaging option made from recycled plastics, typically PET and HDPE plastic products.

## **? What is GRS?**

- ✓ GRS, or Global Recycled Standard, is a voluntary product standard for tracking and verifying the content of recycled materials in a final product. It encompasses the entire supply chain and addresses traceability, environmental principles, social requirements, chemical content, and labeling. Saveway Supplies is GRS certified.

## **? Why it is important to be GRS certified?**

- ✓ Being GRS certified is important because it allows you to communicate your commitment to truth in materials and support for a circular economy that reduces waste by repurposing materials into new products.

## **? What % of PCR content is available from Saveway Supplies?**

- ✓ Saveway Supplies offers flower, vegetable, and herb bags with 30% and 50% PCR content.

## **? Which resins are eligible to use PCR material?**

- ✓ PCR material can be used in certain resins, including CPP, BOPP, and LDPE, with Saveway Supplies offering up to 50% PCR content in these materials.

## **? Is there a minimum order requirement for 30% or 50% PCR?**

- ✓ There is a minimum order requirement for 30% or 50% PCR content. Customers should contact their sales representative for more information.

## **? Is the PCR price higher than regular virgin material?**

- ✓ PCR material prices may vary, but Saveway Supplies has negotiated special rates with resin suppliers to support sustainability efforts globally, making PCR material more accessible.

## **? Can PCR material be recycled again?**

- ✓ PCR material can be recycled again after use by placing the bag in a recycling bin.

## **? Has your manufacturer met the Global Recycled Standards?**

- ✓ Saveway Supplies' bag factory has met the Global Recycled Standards (GRS) and is GRS certified, ensuring that bags marked with PCR can be tracked and verified, meeting strict production requirements.

## **? What is the goal for GRS which we are certified?**

- ✓ The goal of GRS is to increase the use of recycled materials in products and reduce or eliminate the harm caused by production processes.

# Your Produce and Floral Packaging Partner

*From Growing, Harvesting, Processing to Retail, we've got you covered.*

## SAVEWAY SUPPLIES – WHAT WE DO

With over 20 years of agricultural packaging expertise, we know how important competitive prices and excellent service is to you. That is why we have partnered with manufacturers domestically and internationally in order to provide you with the best products and services. We have a team of excellence ready to help you design, print, ship and manage inventory for you. Our JIT program has set us aside from our competitors.

You do the growing and let us manage your packaging supplies from start to finish. We are not just a supplier; **WE ARE YOUR PARTNER IN PACKAGING.**
